

Anjali Nair

📍 11A Heath Road, Welwyn, AL6 0TP | ☎ 07453 662 561 | ✉ anjali.p.n@gmail.com

Professional Summary

Results-driven Full Stack Engineer with 17 years of experience architecting scalable, resilient enterprise applications. Adept in Java, Spring, Microservices, and cloud-native development, with hands-on expertise across front-end frameworks, backend systems, and integration middleware. Proven track record in Agile environments, leading cross-functional teams, delivering high-impact solutions, and mentoring junior developers. Passionate about clean code, system design, and continuous delivery.

Core Competencies

- Languages & Frameworks: Java, JavaScript, TypeScript, React, Angular, Spring Boot, Hibernate, Blueprint
- Integration & Middleware: Mulesoft, Kafka, Apache Camel, JBoss Fuse
- API Design: RESTful APIs, GraphQL
- Databases: MySQL, PostgreSQL, MongoDB, Cassandra
- DevOps & CI/CD: Git, Jenkins, CircleCI, Terraform, Docker
- Testing: JUnit, Selenium, Wiremock, TDD, BDD
- Cloud & Infra: AWS (previously certified), Terraform, IAM
- Methodologies: Agile (Scrum), Test Automation, CI/CD Pipelines

Professional Experience

HSBC – Full Stack Engineer

Sep 2022 – Present | London, UK

- Lead engineer overseeing solution design, full-stack development, and production support.
- Collaborated with product owners and architects to reduce technical debt and improve system resilience.
- Acted as a technical mentor for junior developers and led code reviews and architecture discussions.
- Improved CI/CD pipelines and integrated container-based deployments.

ECS Consultancy – Senior Delivery Consultant

Dec 2018 – Sep 2022 | London, UK

- Led end-to-end delivery of multiple enterprise-level projects across industries including finance, media, and public services.
 - Architected and deployed scalable cloud-native applications using AWS services such as EC2, S3, Lambda, and CloudWatch.
 - Designed and implemented CI/CD pipelines using Jenkins and Terraform to enable automated, reliable deployments.
 - Facilitated cross-functional collaboration between developers, QA teams, and product owners to ensure alignment with business requirements.
 - Managed project timelines, technical risks, and resource allocation, delivering all projects on time and within budget.
- Provided technical leadership in solution design, sprint planning, and post-release support phases.

Emeldi Ltd – Senior Java Developer

Sep 2014 – Nov 2018 | London, UK

Camden Council Projects:

- Architected microservice-based alert systems for planning and housing using Liferay, JBoss Fuse, and Camel.
- Designed REST APIs with support for XML/JSON payloads for cross-platform integration.

GE Capital / Arval:

- Led migration from TIBCO to Liferay; implemented IAM and ACM solutions using MongoDB.
- Developed and customized portlet frameworks with secure iframe communication.

Infosys Ltd – Java Developer

Mar 2010 – Dec 2012 (Australia) | Feb 2008 – Feb 2010 (India)

AMP / Westpac:

- Spearheaded the development of automated test data and metrics reporting systems.
- Created a customized Metrics Dashboard for enterprise-level reporting and defect tracking.
- Conducted client-facing demos and documentation for users and admin teams.

Career Break & Relocation to UK

Jan 2013 – Aug 2014

- Maternity leave and permanent relocation to the UK.

Education

Bachelor of Technology in Computer Science

University of Calicut, Kerala, India | 2007
